Professional Coach Training (PCT1)

Developing Leadership Excellence and Effectiveness

September 19-21, October 3-5, and October 17-19, 2019

Albuquerque, NM

Professional Coach Training 1 equips you to:

Develop leadership effectiveness. Learn how to empower others. Earn your coaching credential while tapping into your leadership potential. Our Professional Coach Training program equips leaders and professionals with the skills to be an effective coach, develop a coaching culture, and use a coaching approach in all aspects of leadership. In addition, this program will look at how to develop a coaching practice either internally in an organization or externally as a coaching professional.

Get results by bringing out the best in individuals, teams, and organizations. Coaching isn't about fixing or solving problems. Rather, coaching is a developmental or discovery-based process that promises growth and sustained results. Coaches further develop the skill and talent already inherent in those with whom they work.

Receive coaching as part of the training process. Coaches-in-training receive their own coaching. This means dedicated one-on-one time to speak openly about challenges, goals, and outcomes. Your professional coach is committed and able to draw out the best in you so you are at the top of your game.
